## PROJECT EXPERIENCE

**Title: Event classification in cricket with AI.**

Description:Developed a system using Convolutional Neural Networks (CNN) and Long-term Recurrent Convolutional Networks (LRCN) to segment and classify video clips. Extracted frames using pre-trained models for feature extraction, combining CNN for spatial features and LRCN for temporal sequences. Built a MERN stack web application to display results, with a Node.js and Express.js backend for RESTful APIs and a React frontend for an interactive user interface.

**Title: Gesture Controller**

**Description**: Developed a gesture controller in Unity using MediaPipe, enabling real-time hand tracking and gesture recognition. Implemented the system to enhance interactivity and control within Unity applications, demonstrating proficiency in integrating advanced machine learning frameworks with game development.
